

Web Programming

Web Design is very important, but usability is the key... Web design must be appropriate to the required functions that our client's web site should fulfill. We are careful about taking into account the way you want to project your organization to the public at large.

Trendywebs creates appropriate and attractive web designs that would ensure to attract your audience and effective communication of your message. Our professional designers work with strong emphasis on making web sites intuitive and produce cutting edge multimedia applications and web sites. We are working in both Open source & Licensed Proprietary web development technologies and platforms. We specialise in PHP, ASP, ASP .Net, C#, Java, Javascript, Apache, MySQL, Tomcat, MS-SQL, XML, XHTML. We are also open to learn new technologies to complete and achieve the objectives. Our latest Web Programming achievement being in being thorough with AJAX (Asynchronous Java Script & XML)

Every site design is targeted to a specific web audience, and our designers create customized look that match your products and services. We are dedicated to the success of our client's each project. From creating a web site that promotes your existing products to developing an entirely new corporate identity of your company, we can serve all your requirements.
