

Data Processing

We convert data (in any form) to the latest database format and produce quality software products, on time and within the budget. For all your data conversions and migration needs, we deliver customized support and services.

Data conversion and Data Migration services comprise of1) Database conversion from one format to another.

2) Image scanning and OCR cleanup.

3) SGML/HTML custom coding.

4) Query based search and Retrieval Modules.

5) Data entry from images.

6) Data entry development.

7) Data conversion from VG to HPChem.

8) Data conversion from Dbase, Ingres, Oracle, Excel, Lotus, Access.

9) Converting data from UNIX or VAX to PC.
